## LUNCH BUNCH CLUBS

### KATOM, KESEF, LAVAN, SAGOL & YAROK ROOMS

November 2018

Dear Families,

Welcome to the Winter/Spring session of Lunch Bunch Clubs. We are happy to provide this "Lunch Bunch Clubs" opportunity for our 2.2 - 3 year olds. Lunch Bunch Clubs are an optional after school program, which extend the school day by one hour and are designed to promote developmental growth in all areas including: social learning, self-help skills as well as gross motor skills. Children bring their own lunches from home, and following lunch, engage in special projects and activities as described below. **Many children enjoy spending some extra time in school, but please consider your child's individual needs when deciding if extending his/her school day is appropriate.**

The Winter/Spring 2019 session begins in January and ends in May. All classes are taught by Nursery School teachers. No partial sessions are being offered.

At 12:00pm or 12:15pm dismissal time, your child will be escorted by his/her teachers to his/her Lunch Bunch Clubs classroom where they will be greeted by their Lunch Bunch Clubs teachers and begin eating lunch and engaging in activities. You will pick your child up directly from his/her Lunch Bunch Clubs classroom at 1:15pm and may retrieve your child's belongings from their classroom either before or after picking your child up.

You will find a **two-page application** attached including specific dates, teacher names and tuition costs for each Lunch Bunch Club. Joining is optional and you are free to choose between one or all of the clubs being offered. Please note that enrollment is on a first come, first served basis. In the event that we receive more applications for a particular club than we have space for, we will do our best to accommodate your child and we will contact you to confirm should this occur. Classes are being offered as follows:

MONDAY	TUESDAY	WEDNESDAY	THURSDAY
<i>Lunch Bunch Music with Paige Borden</i>	<i>Lunch Bunch Bookworms with Marissa Shatzkamer</i>	<i>Lunch Bunch Science with Marissa Shatzkamer</i>	<i>Lunch Bunch Cooking with Nancy Kwong</i>
12:00 - 1:15pm	12:00 - 1:15pm	12:00 - 1:15pm	12:00 - 1:15pm

If you have any questions, please email Ethel Alhale at [ealhale@tstnyc.org](mailto:ealhale@tstnyc.org).

# LUNCH BUNCH CLUBS DESCRIPTIONS

<p><b>MUSIC</b>– Music enriches children's development and enables them to cultivate an appreciation for the arts through a variety of different types and styles. Studies show that music builds critical thinking, creativity, and a wide range of skills.</p>	<p><b>BOOKWORMS</b> – The magical world of reading awaits your child! Join us each week as we explore different adventures. Each session we will read a classic children’s book and then do a corresponding activity such as: cooking, acting out the story or an art project!</p>
<p><b>COOKING!</b> – Cooking with children is an ideal way to teach principles of good nutrition and encourage lifelong healthy eating habits. Studies show that children are more likely to try new foods when they have a hand in preparing them. Children that are exposed to new ingredients are expanding their stock of acceptable foods, setting them on a path to be "good eaters" for life. Did you also know that cooking gives preschoolers an early grounding in science, math, language, art, and even reading! The kitchen offers abundant lessons in basic chemistry—discovering how certain ingredients combine, react, and change as they cook. When students describe what they see, taste, and feel, they are feeding their vocabulary. Exposing kids to the myriad colors and textures of food provides them with a whole new creative palette —and palate. Plus, reading through a recipe helps children learn how to follow words from left to right, while beginning to distinguish numbers from letters. Fine-motor skills are also enhanced when little fingers tear, stir, and pour.</p>	<p><b>SCIENCE-</b> Science club encourages children to discover, explore and investigate the world around them. Science club is a place where children will learn and investigate scientific topics and concepts in a way that is educational as well as fun and exciting! The children will participate in hands on, innovative and creative science activities and experiments, while also developing their vocabulary and knowledge of the scientific process. Children are encouraged to think, talk and work like scientists.</p>
