AFTER SCHOOL CLUBS

PRE-K: KACHOL ROOM

November 2018

Dear Families,

Welcome to the Winter/Spring 2019 session of After School Clubs. It is our pleasure to be making this special enrichment available to students ages 3.2 and up. Clubs give your child the opportunity to participate in art, theater, cooking and playing sports.

The Winter/Spring 2019 semester begins in January and ends in May. All classes are taught by nursery school teachers and meet daily from 2:30pm – 3:30pm, Monday through Thursday.

At 2:30pm your child will be brought to their After School Club classroom where they will be greeted by their After School Club teachers and begin work. You will pick your child up directly from his/her After School Club classroom at 3:30pm and may retrieve your child's belongings from his/her classroom either before or after picking your child up.

You will find a **two-page application** attached including specific dates and teacher names for each After School Club. Joining is optional and you are free to choose between some or all of the clubs. Please note that enrollment is on a first come, first served basis. In the event that we receive more applications for a particular club than we have space for, your child will be accommodated in another After School Club and we will contact you to confirm should this occur. Classes are being offered as follows:

MONDAY	TUESDAY	WEDNESDAY	THURSDAY
<i>Music & Theater Club with Eric Davis & Samantha Warner</i>	<i>Cooking Club with Arielle Mehraban</i>	<i>Science club with Eric Davis & Michelle Moskowitz</i>	<i>Atelier art club with Tonya Mossey</i>
2:30 – 3:30pm	2:30 – 3:30pm	2:30 – 3:30pm	2:30 – 3:30pm

If you have any questions, please email Ethel Alhale at ealhale@tstnyc.org.

AFTER SCHOOL CLUB DESCRIPTIONS

SCIENCE CLUB - Science club encourages children to discover, explore and investigate the world around them. Science club is a place where children will learn and investigate scientific topics and concepts in a way that is educational as well as fun and exciting! The children will participate in hands on, innovative and creative science activities and experiments, while also developing their vocabulary and knowledge of the scientific process. Children are encouraged to think, talk and work like scientists.

COOKING CLUB - Cooking with children is an ideal way to teach principles of good nutrition and encourage lifelong healthy eating habits. Children are more likely to try new foods when they have a hand in preparing them. Children that are exposed to new ingredients are expanding their stock of acceptable foods, setting them on a path to be "good eaters" for life. Did you also know that cooking gives preschoolers an early grounding in science, math, language, art, and even reading? The kitchen offers abundant lessons in basic chemistry—discovering how certain ingredients combine, react, and change as they cook. When students describe what they see, taste, and feel, they are feeding their vocabulary. Exposing kids to food's myriad colors and textures provides them with a whole new creative palette—and palate. Plus, reading through a recipe helps children learn how to follow words from left to right, while beginning to distinguish numbers from letters. Fine-motor skills are also enhanced when little fingers tear, stir, and pour.

ATELIER CLUB – The Reggio Emilia teacher's conference in Italy provided the inspiration for the development of Atelier Club. Atelier Club is an innovative program that enables students to extend their academic learning through art while utilizing recyclables and other unique materials. The lessons and experiences are developed so that students engage in observation, language development, mathematical concepts and the natural sciences with an emphasis on creativity. Additionally, students are exposed to environmental issues and learn about the benefits of being green. One of our many goals is to build a community of learners that care and value the world around them.

MUSIC & THEATER CLUB

Based on the children's interests, we will pick a story (tale). The children will enjoy participating in the many different parts of bringing this story to life. We will work together to make a list of characters and discuss the plot as well as the setting. As a group, we will create our OWN version of the story and assign parts. We will design costumes together, create scenery, and practice our lines. For the grand "finale", we will put on a performance for everyone! From beginning to end, the process of creating our very own drama production will take into account the children's imaginations while allowing them to practice the art of self-expression through theater.
