### **1. What is *chametz*?**

Food made with one of these 5 grains:

Wheat, barley, spelt, rye, oats

- *Issur akhilah* (forbidden to eat)
- *Issur hana'ah* (forbidden to have enjoyment from food that is *chametz*)

### **2. Which kosher foods are inherently KLP?**

Here is a partial list: fresh fruits & vegetables, eggs, meat/poultry/fish, whole spices, sugar/salt without additives.

## 6. What are *kitniyot*?

Among Orthodox Ashkenazi and some Sephardic Jews, the custom (*minhag*) during Passover is to refrain from not only products of the five grains but also other grains and legumes. Traditions of what is considered *kitniyot* vary from community to community but generally include maize (American corn), as well as rice, peas, lentils, and beans. Many also include other legumes, such as peanuts and soy, in this prohibition. We are strict on *kitniyot* derivatives such as oils and food stabilizers.

- *Kitniyot* are **not** *chametz*
- We do **not** sell *kitniyot*
- *Kitniyot* are forbidden only to be **eaten**

## 7. What is the status of these seeds?

### Non-*kitniyot*:

These may be bought **whole** without KLP supervision; ground seeds need KLP.

- Cumin seeds
- Chia seeds
- Flax seeds
- Pumpkin seeds

### May be *Kitniyot*

- Hemp seeds

## 8. Non-food Items

We do not require non-food items to be specifically KLP as they are not **edible** and therefore do not fall into the category of what is forbidden on Pesach.

Please see product pages in the Passover Guide for OU certified toothpaste. Please see feature article "Inedibles on Pesach" on page 33.

## 9. Toiletries

- New toothbrushes are a must
- Toothpaste/Mouthwash: you may already have one of these products at home. You may want to pick one up before Pesach.
- For all products: unopened is great. If opened, inspect visually for possible *chametz*.

## 10. Medicines

- Pills that are swallowed and not *derech achilah* (the normal way of eating) and are not *ra'ui le'akhilat kelev* (fit for dog's consumption) **may** be swallowed on Pesach.
- Gelcaps are an exception as they may have *chametz* in the makeup. Sometimes you can find out the ingredients. All things being equal, if it's possible to find a replacement, that is preferable as we tend to be strict about *chametz*. If not, take what you need.
- We are more lenient about medicines containing *kitniyot* than we are about food containing *kitniyot*.
- A quick pick-me-up medicine list from Star-K can be found [here](#) on p. 37.

## 11. Vitamins

- If non-chewable, there is no problem taking them on Pesach.
- If chewable, check with your doctor. If it is important for you to take it, treat it like medicine. It also may be possible to check on the ingredients for *chametz*. For *kitniyot* we can be lenient.

## 12. Pet Food

- Pet food with only *kitniyot* is not a problem as we are allowed to have *hana'ah* (enjoyment), but not allowed to eat it. Our pets are!
- If your pet requires (or will only eat) a *chametz* diet, please check with someone on the rabbinic team as you then must sell your pet as well as the pet food. We will stipulate that the non-Jew are allowing you to use **their** pet food to feed **their** pet over Pesach. Otherwise you will be owning *chametz* in the pet food OR will be getting enjoyment out of your pet eating *chametz* food.
- See [Star-K 2023 Pesach Guide](#)

## 13. Cosmetics

As with other non-food products, there is no problem owning and using whatever cosmetics you have as they are not edible. It is good though, to visually inspect lipsticks that have been used for any food particles.

However, if you are unsure because of the listing of chametz ingredients, use this site [www.ASKcRc.org](http://www.ASKcRc.org) to check and use [www.crckosher.org/lipstick](http://www.crckosher.org/lipstick) to check your lipstick.
