Temple Shir Tikvah Requirement for 5-11 year-old vaccinations (Approved at Board Meeting 11/15/21)

The CDC has approved vaccination for 5-11 year olds.
From the CDC website:

- Vaccinating children can help protect family members, including siblings who are not eligible for vaccination and family members who may be at increased risk of getting very sick if they are infected.
- Vaccination can also help keep children from getting seriously sick even if they do get COVID-19.
- Vaccinating children ages 5 years and older can help keep them in school and help them safely participate in sports, playdates, and other group activities.

Similar to our decision for vaccine requirements for all people over the age of 12 (for school and in-building attendance), we have approved requiring vaccination over the age of 5 with 3 months from 5th birthday (or 3 months from November 15, 2021) to complete the vaccination protocol.
