

'Set & Forget' Instructions

You will need to turn off automatic sleep mode on your device.

1. Make sure your device is **plugged into power**.
2. For iPhone/iPad, in settings, under display and brightness, set auto-lock to never.

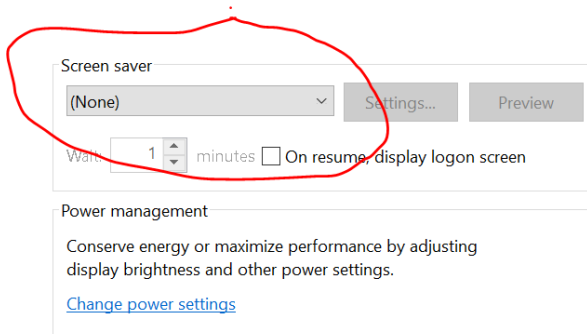

3. For PC Windows 10

Write 'screen saver' in the search box next to the Windows icon.

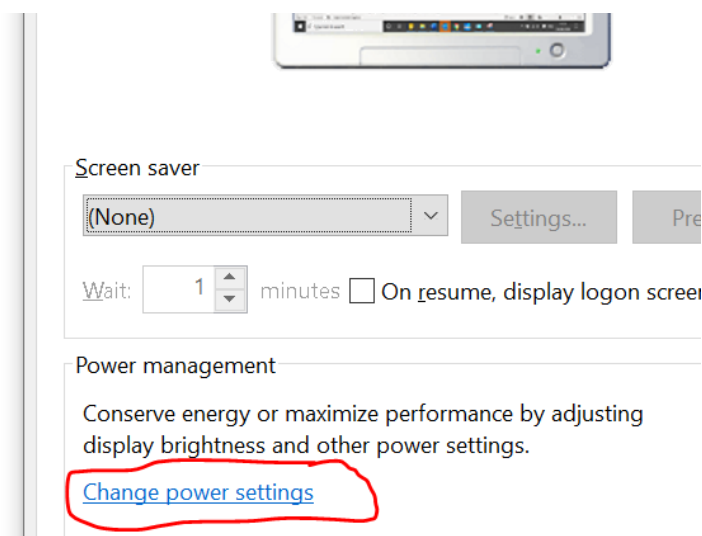

Select the option 'Turn screen saver on or off'

Then select 'None' in the drop-down box marked 'screen saver'

Then click the option 'change power settings'

Click in 'change plan settings' on the far right of that window.

Choose or customize a power plan

A power plan is a collection of hardware and system settings (like display brightness, sleep, etc.) that manages how your computer uses power. [Tell me more about power plans](#)

Selected plan

Balanced (recommended)

Automatically balances performance with energy consumption on capable hardware.

[Change plan settings](#)

Then select in the column and row 'plugged in' 'turn off the display' the option 'Never'.

Then select in the column and row 'plugged in' 'put the computer to sleep' the option 'Never.' Then click 'save changes'.

Change settings for the plan: Balanced

Choose the sleep and display settings that you want your computer to use.

 On battery  Plugged in

Turn off the display: 5 minutes

Put the computer to sleep: 15 minutes
