

Congregation Hakafa **Religious School Curriculum Outline**

All-School Education Days

Three times throughout the year, our Kindergarten through Eighth Grade students come together for special All-School Education Days designed to provide our students with creative, intensive, experiential, and mixed-age Jewish learning on a specific topic.

Field Trips

Each grade level (K-8) has its own field trip (or a special program in place of a trip) during which students and their parents participate in a program designed to help create community and provide our students and families with experiential Jewish learning in the greater community that is related to the grade level's curriculum.

GRADES K – 2

In addition to core curriculum at each grade level and weekly music and Israeli dance instruction, students participate in our Hebrew Readiness Program. Through this program, students are introduced to basic Hebrew words through music and games. Students work in books in which animated text introduces each Hebrew letter along with Jewish symbols that begin with the corresponding letter. In addition, students begin to learn and recite blessings associated with Shabbat, Hanukkah, and Pesach. Upon completion of second grade, students bring home their book that has followed them through these three years.
