

Due to the rise of the Delta variant the TBT COVID Task Force, in accordance with current CDC guidelines and in consultation with our medical advisory team has made the following policy and procedure changes to help ensure the safety of our congregational community, effective immediately:

1. Anyone over the age of three years old, regardless of vaccination status, is required to wear a mask inside our synagogue facilities, including during programs and worship services. Virtual options remain available for all sanctuary services. Any events held outdoors will remain mask optional.

2. We are extending the moratorium on indoor food events. All food related events must take place outdoors, and we encourage the use of our beautiful campus spaces.

3. Currently our High Holy Day schedule remains unchanged. We plan to offer both In-person and streaming options in the TBT sanctuary for adults B'nai Mitzvah age and above, with outdoor programming for children aged 0-12.

We continue to closely monitor COVID 19 trends. Should further modifications to our health and safety protocols become necessary, we will communicate those changes in a timely manner.
