

# Beth Israel Community **LEARNING LAB REIMAGINED ELECTIVES**

Fall Semester 2021-2022

## *SUNDAY OFFERINGS*

*On ShulCloud please rank your choices for each elective.*

Joseph and Corinne Schwartz  
Beth Israel Community  
**LEARNING LAB**

### **3RD-5TH GRADE**

#### **ELECTIVES:**

#### **Holidays Through Art with Morah Fallon**

We will explore the Holidays using different mediums and styles of art to depict each holiday story, characters, meanings, prayers, customs, traditions, and symbols.

#### **Jewish Debate with Moreh Rick**

Through the years Jews have always loved to debate from politics, to our land of Israel, to who has the best pastrami sandwich. This elective will give them a voice, help shape their ideas and help them to understand other peoples points of view while holding on to their own ideals and opinions. Through this the students will get a clearer sense of who they are and what is important to them and what they stand for.

#### **Israeli Inventions with Morah Fallon**

Did you know we wouldn't have cell phones without Israel? Israel has contributed so much to society through innovations in medicine, technology, and other areas of life. Learn more about the amazing inventions this tiny country has created. We will even invent something ourselves!

#### **Calling All Thespians with Moreh Rick**

The students will write one play during the 1st Semester. The students will write, direct, build and paint their own sets and make their costumes. The subjects will be relevant and relatable. It can be anything from recreating a story in the Torah to a time in Jewish History but putting their own spin on it.
