

How do I add to the "Give 60" Padlet?

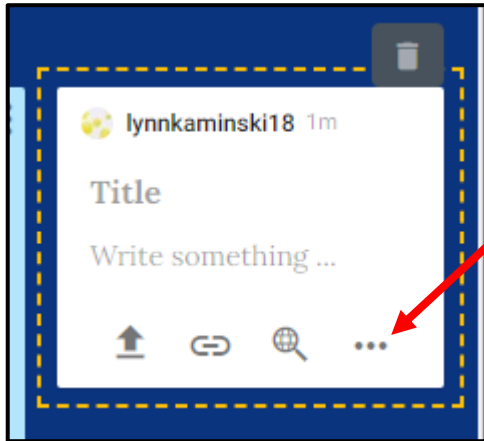

Once you have opened the Padlet, click on the plus sign (+) at the bottom of the page.

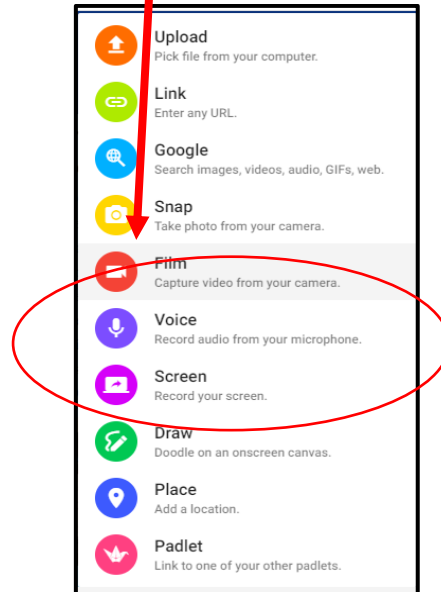

Add a label for your activity, and some text to give details about what you did.

You can add photos from your camera, or attach links to information about your activity.

If you click on the three dots at the bottom of the posting box, you can also add your voice talking about the project, or take a picture or video of the activity.

When you are done with your post, just quit Padlet. **Your work will be saved automatically.** All posts will be reviewed before going "public," but you **can** go back to your post to add or edit.

To **edit**, click on the three dots at the top of your post, make the changes you wish, and quit when done. Changes will be saved and reviewed, as above.
