AIPAC Israel Update

IDF Destroying Hezbollah's Last, Largest Cross-Border Attack Tunnel

Six months after the Israeli military declared an end to Operation Northern Shield, the IDF has begun destroying the final and largest cross-border tunnel dug by Hezbollah into Israeli territory, The Jerusalem Post reported. The tunnel began in the Lebanese village of Ramiyeh and stretched one kilometer before infiltrating several meters into northern Israel, close to the communities of Zarit and Shtula. It was the last one discovered by the IDF in early January, the largest and most strategic of the six cross-border tunnels dug by the Lebanese Shi'ite group. Hezbollah had planned to have dozens of armed terrorists attack the nearby communities in the next war with Israel. Unlike the tunnels dug by terrorist groups in the Gaza Strip, each one found by the military on the Lebanese border had different characteristics, with some strengthened by concrete while others were burrowed straight into the rock. The Ramiyeh tunnel had been dug at a depth of 80 meters and had 20 flights of stairs. The tunnel, which took Hezbollah several years to dig, also contained railroads to transport equipment and garbage, and was equipped with lighting equipment, air-conditioning and ladders.
