“Passing Through · 2019”

Dr. Daniel Jackson, computer science professor at MIT and photographer, will speak and lead a conversation exploring mental health issues, what our tradition teaches us about mental health challenges, the stigma that can often accompany these issues, and the ways that members of our community can support one another.

Dr. Jackson’s book, “Portraits of Resilience,” addresses MIT students, faculty, and staff who have struggled with mental illness and how their journeys led them to deeper meaning in their lives.

***This event is free and open  
to the public.***
