The Idea School's Virtual Open House

Watch our video at <https://youtu.be/ymlLz6X1r4U> to learn more about our Modern Orthodox Co-Educational High School, Project Based Learning and our unique partnership with the Kaplen JCC on the Palisades.

Register for the Open House at www.theideaschool.org and apply at www.theideaschool.org/admissions.

The Idea School is a co-ed, modern Orthodox Jewish high school located at the Kaplen JCC on the Palisades in Tenafly, NJ. We are currently the only Jewish high school in America to fully use interdisciplinary, project-based learning (PBL), which focuses on creative, hands-on learning as opposed to traditional tests and exams. We teach traditional subjects and disciplines by organizing information around questions students find interesting and problems they have to solve. Students then create products and projects that are meaningful to them and in the real world.

JScreen is a non-profit initiative providing easy, affordable, at-home testing on saliva for over 200 genetic diseases, including those most common in people with Ashkenazi, Sephardi, and Mizrahi backgrounds. Genetic carrier testing helps individuals and couples understand their genetic risks and plan ahead for the health of their future families. It's essential for all couples to get tested before eventually starting or expanding their families. To learn more, request a kit, or purchase one for a loved one, visit www.JScreen.org

Talleisim for Burial—Jewish men are generally buried in a tallit. There is currently a campaign by the Hebrew Free Burial Association to collect talleisim for the burial of Jews whose talleisim can't be located or did not have their own. The HFBA arranges respectful levayaot and burials for Jews whose families can't afford to do so. There is a bin in front of 1136 Korfitsen Road, New Milford, where talleisim can be dropped off. Here is a video that demonstrates what they are facing with Covid-19: <https://youtu.be/cRw63XDcyMs>.
