

PC Browsers

Google Chrome

Go to the three-dot menu (⋮) at the upper-right of [Chrome](#) to select **Settings > Advanced > Privacy and security > Clear browsing data** or **History > History > Clear browsing data** or **More tools > Clear browsing data**. Or type "chrome://settings/clearBrowserData" in the omnibar without the quotation marks.

Any of these options takes you to the dialog box to delete not only the history of your browsing, but also your download history (it won't delete the actual downloaded files), all your cookies, cached images and files (which help load pages faster when you revisit), saved passwords and more.

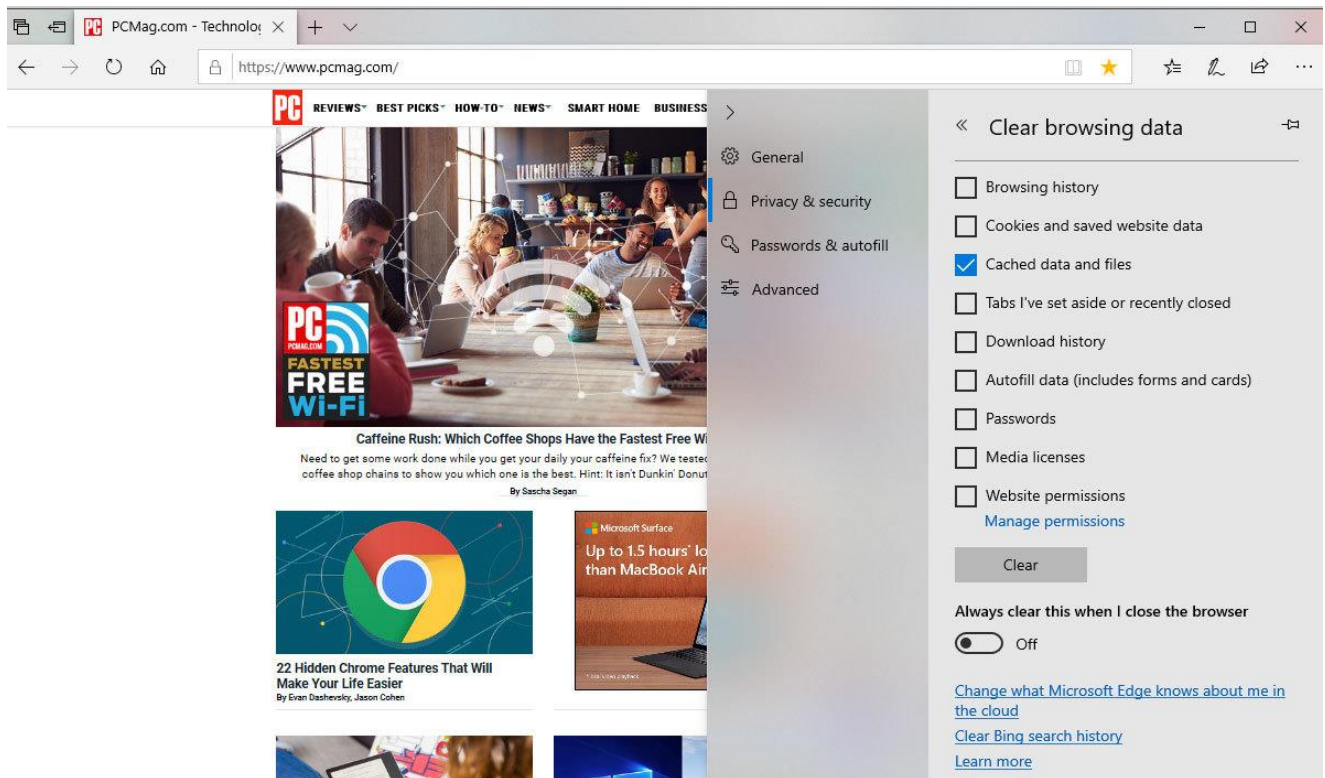

Better yet, you can delete only the info from the last hour, day, week, month, or all of it to "the beginning of time."

Microsoft Edge and Internet Explorer

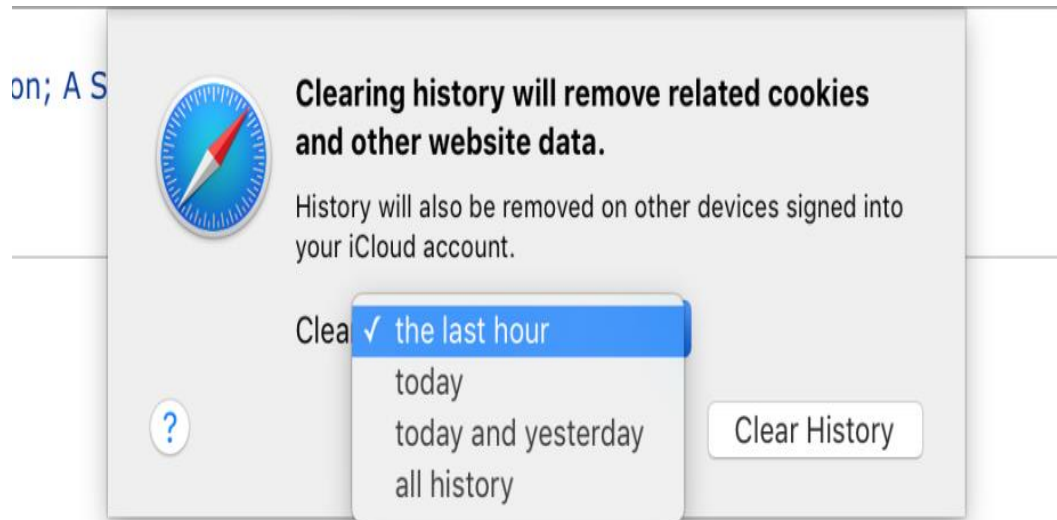

Go to the three-dot menu (⋮) in [Microsoft Edge](#) and select **Settings > Privacy & security**; in the fly-out menu, click the button under Clear browsing data that reads "Choose what to clear."

Here you can get rid of browsing history, cookies, cached data, stored form data, saved tabs, media licenses, website permissions, and stored passwords; click Manage Permissions and you can delete things like sites you've given permission to show pop-ups.

Safari

On [macOS](#), Safari rules. Clearing your website visit history is simple: click Clear History in the History menu. Then in the pop-up, pick a timeframe for how far back you want to erase. This is doing a lot more than deleting the browser history, however—it also takes out your cookies and data cache.

You can instead click **History > Show History** to get a pop-up displaying every site you've visited, then take out sites individually, without losing the cookies and cache. Zap cookies by going into Preferences > Privacy; delete your cache by going to the Develop menu and picking Empty Caches. If you don't have a Develop menu in Safari, go to Preferences > Advanced and check *Show Develop Menu in Menu Bar* at bottom.

Mozilla Firefox

In the latest version of [Firefox](#) go to the hamburger menu (☰) and section **Options > Privacy & Security**. You're instantly in the Content Blocking section; scroll down to get to History. Set Firefox to remember, to never remember, or get some custom settings like remember history, but not cookies, or whatever.

This section also has a Clear History button. Click it to pick a time range to clear (1, 2, 4, or 24 hours—or everything), and what data to dump (history, logins, forms/search, cookies, and cache).
