The Almighty makes his involvement behind the veil of nature, making it appear as though events occur randomly and haphazardly. He does this in order to allow us the free will to decide, whether we believe He is involved in our lives or we attribute everything to happenstance. It's interesting that the Hebrew word for coincidence (מקרה) has the same letters as רק 'מה (only from G-D). Those who see through the mask of nature are privileged to see G-d's involvement in their lives on a daily basis.
