“DIABETES IN THE 21ST CENTURY”

With Dr. Simon Fisher, MD, PhD
Physician Scientist at the University of Utah

Dr. Simon Fisher received his MD and PhD degrees from the University of Toronto Medical School. He received his internal medicine and endocrinology training at the Beth Israel Deaconess Medical Center at Harvard University. He received subspecialty training at the Joslin Diabetes Center in Boston and is currently a Professor of Medicine at the University of Utah.

Dr. Fisher is a distinguished physician scientist. His research investigates the pathophysiology and treatment of diabetes, insulin action, tissue specific cross-talk, complications of diabetes, and hormonal counter regulation. He is a member of the American Society for Clinical Investigation and is named in Best Doctors in America.

Dr. Fisher and his wife, Joy, live in Salt Lake City with their 4 children.

Registration Fee: \$18

**Please consider a larger donation to Hadassah
where diabetes research, education and prevention are in the forefront!**

♥ We are proud to bring the cutting-edge work from Hadassah Medical Organization to the forefront of clinical diabetes and connect it with behaviors and actions we can take in our everyday lives. We are committed to financially supporting HMO in order to continue these lifesaving breakthroughs and we are proud to spread the message to connect others to this mission.

♥ Each of us can learn simple ways to shift their eating habits to make big changes in our heart health. We can cook more of our own meals, choose foods with less added sugar or salt, eat more fruits and veggies, or read nutrition labels carefully. Our goal today is to think about what change we can make in our own lives and try to stick to it.
