

THE 6 MOST IMPORTANT YEARS IN YOUR CHILD'S LIFE

From age 5 to 11, your child experiences an explosion of developmental growth. He forms his own ideas, makes choices, builds connections. The K-5 years shape how he learns and how he sees himself... in middle school, college and the world. He gains the skills to communicate, collaborate and succeed in a global society.

Growing up Perelman

Our unparalleled dual-language curriculum strengthens your child's cognitive development, sharpening his ability to solve problems, focus attention, reason creatively and process abstract information.

Research confirms that this bilingual advantage enhances how he *thinks* – about math, reading, even the arts.

Our students learn how to learn. And they do it all through a rich lens of Jewish heritage and values.
